

# Sky High String Art

### Let's get started!

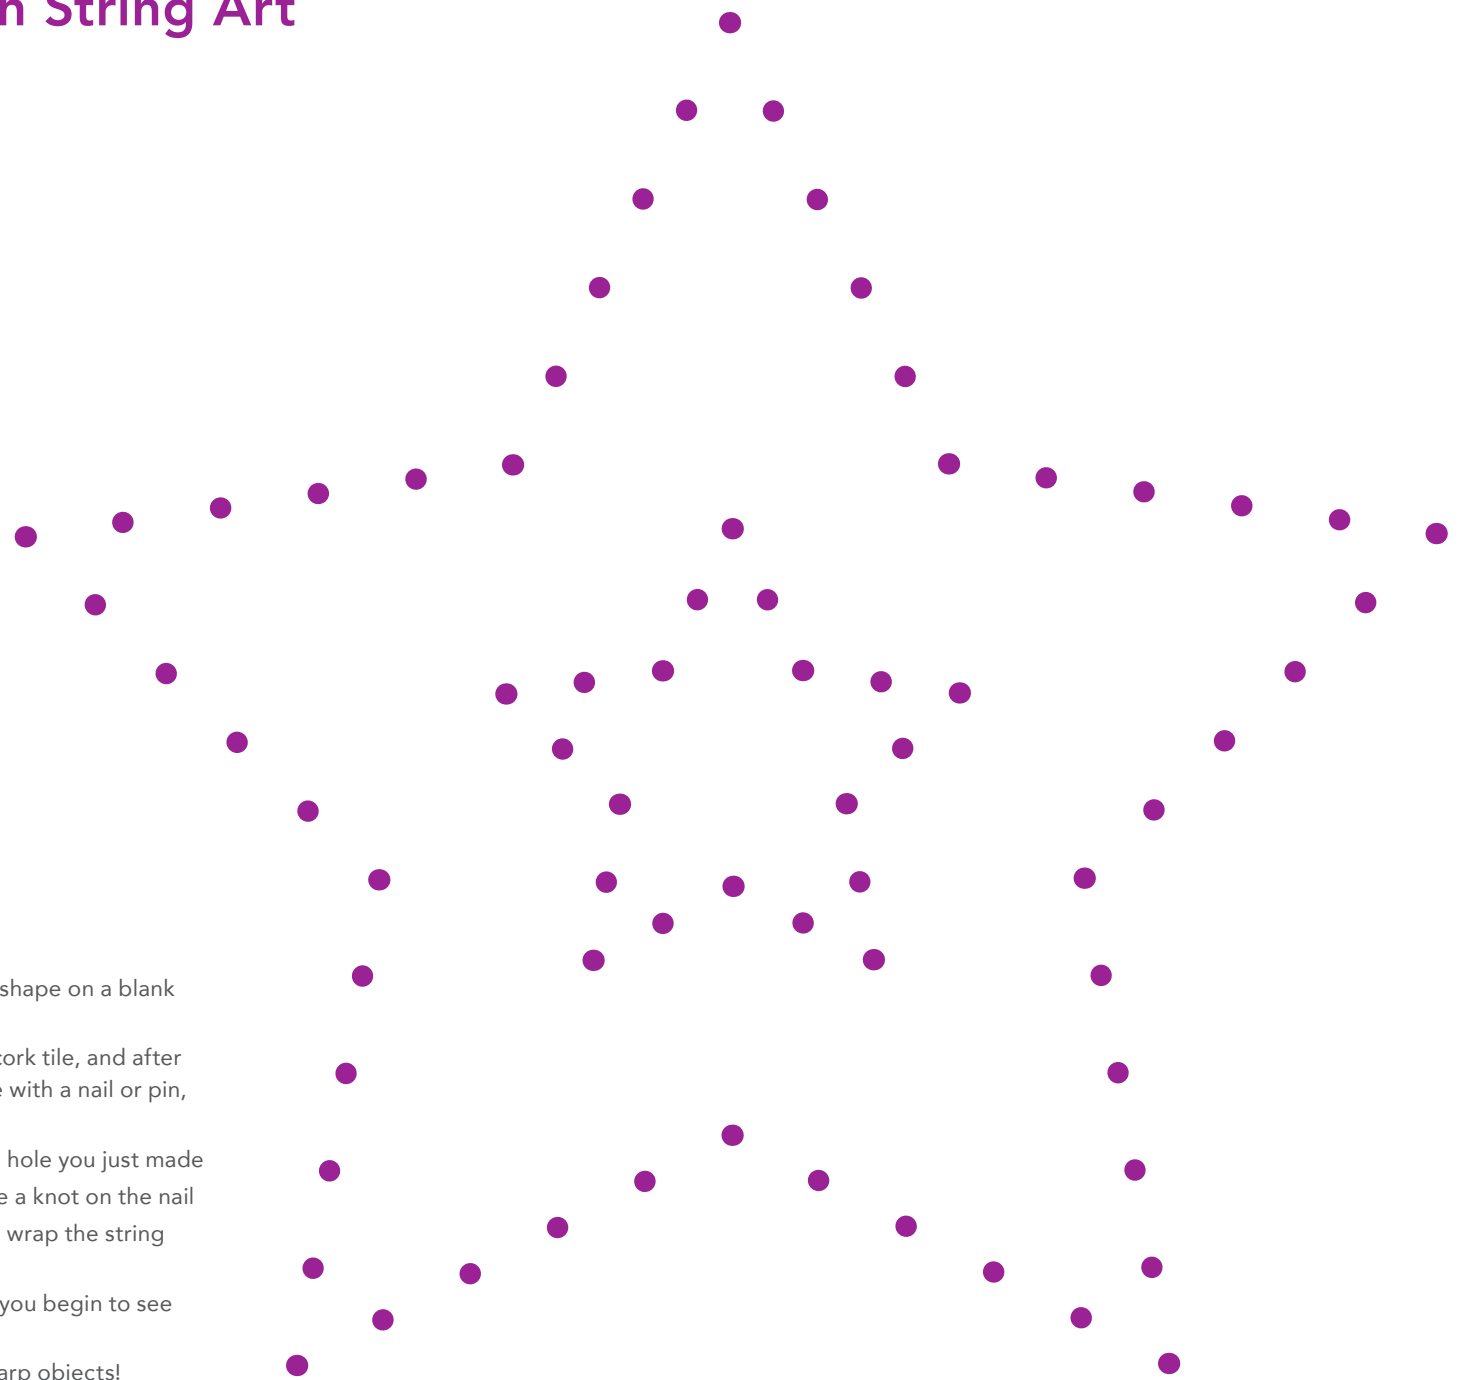

1. Use this template or draw your own cloud shape on a blank sheet of paper
2. Place your paper over the foam core or cork tile, and after poking holes in the dotted shape outline with a nail or pin, remove the template
3. Securely place the nails or pins into each hole you just made

4. Pick a spot to start with the string and tie a knot on the nail
5. With the string, go across the shape and wrap the string around another nail
6. Continue stringing from nail to nail until you begin to see your shape take form

\*\* Ask your parents for help when using sharp objects!
